# **SITUATION SUMMARY**

## **CESRS and FIRENET**

Until further notice, Field Staff have no ability to connect to the California State Warning Center outside the Sacramento area. As part of the microwave update, Public Safety Communications has severed microwave paths that supported the CESRS and FIRENET networks.

- As an alternate means to reach field staff when cellular or other methods are unavailable, the MSAT vehicle mounted Satellite system is available. The system provide push-to-talk talk groups to allow staff to communicate during an emergency.
- Please contact the Cal OES Telecom Duty Officer or the Regional Communications Coordinator for any assistance. This will only allow for local communication between Duty officers and field staff on these networks.
- This microwave communications update does not affect CLERS.
- There is no date for restoration of these systems.
- If there is a change, TACCOM will send out notifications.
- The CERS network is fully functional for all “on route” communications. “Off route” communication is not supported, which is communications with radio sites that are not on the same path. Refer to the link provided for impacted sites. Page one shows Routes by color, while page two provides a chart indicating which areas are considered “off route.” Link: [CESRS Routing and Dialing](#)
